DON'T GET RUGGED

FREE · BOB'S SURVIVAL SHEET

5 TRAPS BOB WALKED INTO, AND THE CHECK THAT SAVES YOU FROM EACH

Bob is new to memecoins and a little too fast on the buy button. Learn from his missions before you make the same mistakes.

MISSION	THE TRAP	THE CHECK
01 **The fake support DM**	Bob asks a question in a Telegram group. Seconds later, "support" messages him and asks him to verify his wallet.	Real support never messages you first and never asks for your seed phrase.
02 **The copycat coin**	Bob searches a trending ticker and buys the first result. Same name, same logo, different contract.	Copy the contract address from the official source and search by that, never by name.
03 **The paid shill**	A big account posts about a new coin. Bob buys. The account was paid, bought first, and sells into his buy.	Ignore who's posting. Look at who's holding and who's selling, starting with the dev wallet.
04 **The bundle**	The holder list looks spread out. Really, twenty wallets funded by one person hold 40% of the supply.	Open a holder map, find wallets funded from one source and add up their share.
05 **The coin you can't sell**	Bob's coin is up 5x. He hits sell. Nothing happens.	Check freeze authority is revoked (Solana) and run a sell simulation (EVM) before buying.

BOB'S 60-SECOND CHECK BEFORE EVERY BUY

- [ ] **Copy the contract address** from the official source. Never search by name.
- [ ] **Mint and freeze authority revoked** (Solana), or the sell simulation works (EVM).
- [ ] **Liquidity burned or locked,** and the pool is big enough to sell your size.
- [ ] **Top 10 holders under about 30%,** with no cluster of linked wallets.
- [ ] **The dev wallet holds little and isn't selling.**
- [ ] **Only money you can lose completely.** Never share your seed phrase.

Two or more red flags means skip.

Want the full process? The Memecoin 101 guide (27 pages) covers wallets, reading a token, spotting rugs, sizing and exits. From 7.99€ at **memecoin101.netlify.app**

Bob is a cartoon character and his coins are made up. Education only, not financial advice. Memecoins are extremely risky and you can lose everything you put in. © 2026 Memecoin 101 · NQS · @dont.get.rugged
